

# Dropbox Business admin controls

The Admin Console empowers admins to effectively manage company data. Audit logs and dashboards provide visibility into team activity, while powerful sharing controls ensure that data stays in the right hands. Team management tools help IT simplify onboarding and offboarding while managing devices and apps.

## Admin Dashboard

- View usage data over time
- Monitor important stats:
  - Number of current members
  - Pending invites
  - Remaining licenses
  - Members who have joined in the past 30 days
- Send reminders to those with pending invites
- Invite new members or add licenses

## Visibility & Control

- Set sharing permissions to prevent or enable sharing outside of your organization
- Monitor sharing, device, and session activity through audit logs
- Restrict team members from linking both a work and a personal account to their work computer
- View and manage Group membership across the entire team
- Manage your team more effectively with tiered admin roles: team, user management, and support
- Sign in as users to maintain business continuity and ensure company policies are met

## Team management made easy

- Migrate existing Dropbox accounts to Dropbox Business, and seamlessly create or remove accounts using Active Directory integration
- Remotely install Dropbox on any Windows machine with the enterprise installer
- Add or remove team members from Groups to manage access to relevant files
- Protect business data when employees leave or devices are misplaced using remote wipe
- Suspend user accounts without losing data, and reassign files from one team member to another with account transfer
