

Deliver great products with the secure collaboration tool employees love

Dropbox Business helps retail and packaged goods companies work smarter through every step of the supply chain, from the first designs to the final sale. Keep key stakeholders up to date with a central repository for contracts and budgets, and streamline collaborative processes for design, logistics, planning, and analytics with the tool employees already know and love. Dropbox Business is the secure, collaborative technology that keeps distributed teams on the same page — so they can put great products into the hands of their customers.

✓ Protect company information

- Enjoy peace of mind with a secure, distributed infrastructure with multiple layers of protection
- Protect intellectual property and critical business data when devices are lost or stolen with remote wipe
- Monitor internal and external sharing with comprehensive audit logs to be sure that your recent sketches, recipes, or layouts are always protected

✓ Reduce overhead

- Phase out expensive legacy systems, and control seasonal fluctuations by provisioning renewable licenses on an as-needed basis
- Reduce the number of IT tickets by giving employees a tool they already know and love
- Bring together the fragmented IT ecosystem between POS, logistics, manufacturing, and design software, and reduce the number of tools IT needs to manage

✓ Bring your vision to life

- Quickly sync changes to even the largest design files with Delta, LAN, and Streaming sync
- Preview mockups and illustrations on-the-go, on any device
- Enhance your team's existing workflows with over 300,000 app integrations

✓ Get to market quickly and securely

- Gain more control over the buying, planning, and distribution process by sending stakeholders password-protected or expiring links
- Use shared folders to iterate faster between design, merchandising, marketing, and distribution

Dropbox Business is a favorite solution for retail employees and their IT departments
