

# Empower your team of innovators while protecting your company's next big idea

Dropbox Business helps technology companies build and distribute great products while offering the security they need to keep information safe. As a technology company, we know that every minute counts; that's why Dropbox Business lets employees access and collaborate on projects instantly, no matter where they are or what platforms they use.

## ✓ Build great products

- Upload and share large design files and code without file size limits
- Preview mockups and illustrations on-the-go, on any device
- Enhance your team's existing workflows with over 300,000 app integrations

## ✓ Get to market

- Enable field teams to work faster with mobile apps and offline access
- Work with external agencies and contractors without needing additional licenses
- Easily share content with customers throughout the sales cycle

## ✓ Protect company information

- Enjoy peace of mind while using Dropbox's secure, distributed infrastructure with multiple layers of protection
- Protect business data using remote wipe when devices are lost or stolen
- Monitor internal and external sharing with comprehensive audit logs

## ✓ Support a growing team

- Integrate Dropbox Business with existing identity providers to streamline team management
- Transfer licenses and data from one employee to another as company needs change
- Conveniently give employees access to relevant project, team, or department files using groups

Dropbox Business is a favorite solution for tech employees and their IT departments
